- **Field:** Software Engineering & Entrepreneurship
- **Programming:** Python, C#, SQL, HTML, CSS, JavaScript
- **Special Interests:** UI Design, AI systems, Web Development, Mobile Applications
- **Projects:** AI Website Builder, AI Skin detector, AI Traffic Light detector
- **Business Experience:** Founder – Clermont Foods Limited
- **Location Experience:** Uganda, Zimbabwe

CORE COMPETENCIES

Software Development

- Python Programming
- Object Oriented Programming
- Database Design (SQLite, MySQL)
- API Integration
- Web Scraping (BeautifulSoup)

Web & AI Development

- Modern UI Design
- AI Chat Integration Concepts
- Frontend Development
- System Design
- Software Testing

Professional Skills

- Problem Solving
- Analytical Thinking
- Project Development
- Entrepreneurship
- Communication Skills

PROJECT EXPERIENCE

1. GetSkin Beauty — getskinbeauty.vercel.app

- Designed and developed a full AI e-commerce beauty platform that is able to detect human skin conditions and comes up with product catalogue, modern UI, and seamless browsing experience
- Built with React.js / Next.js, focused on conversion-driven layout and mobile-first design

2. Afro Retro Games — afro-retro-games.vercel.app

- Built an African-themed interactive gaming and games hiring platform celebrating culture through digital entertainment
- Implemented dynamic game interfaces and responsive layouts using modern frontend technologies

3. Aura Uganda — aura-uganda.vercel.app

- Developed a professional business website for a Ugandan brand, delivering brand storytelling through clean UI and structured content architecture
- Handled full design-to-deployment pipeline independently

4. BuildMart — build-mart-gilt.vercel.app

- Engineered a construction materials marketplace connecting buyers and suppliers
- Implemented product listing, filtering, and a clean transactional interface using React.js and Tailwind CSS

5. DriveEase — driveease-rho.vercel.app

- Built a vehicle rental and transport management platform with booking flows, vehicle listings, and user-facing dashboards
- Designed intuitive UX for a service-based business model

6. CUU Student Portal — cuu-portal.vercel.app

- Developed a full university student portal for Cavendish University Uganda featuring authentication, protected routes, student dashboards, and academic management tools
- Implemented secure login system and role-based UI

BUSINESS EXPERIENCE

Founder & Director

Clermont Foods Limited

Responsibilities:

- Built a growing customer base

EDUCATION

Bachelor of Software Engineering, Uganda

Oct 2023 – Present

Cavendish University Uganda

- (Currently studying)

Advanced Level, Zimbabwe

Jan 2012 – Dec 2017

Intellect High School

- 10 Subjects including Mathematics, Science and English

TECHNICAL SKILLS

Programming Languages:

- Python
- C#
- SQL
- HTML/CSS
- JavaScript (basic)

Tools & Technologies:

- Android Studio
- Figma
- SQLite
- Visual Studio
- PowerShell

INTERESTS

- Software Development
- Artificial Intelligence
- Entrepreneurship
- Mobile App Development
- Technology Innovation
- Business Development

QUALIFICATION

- **Advanced & Ordinary Level Certificate** – Zimbabwe
- **Coursera Artificial Intelligence Certificate** – Uganda

HOBBIES AND INTERESTS

- Gym
- Volley-Ball
- Travel
- Graphics Design
